About BackBuckle

BackBuckle.io is a Feature-as-a-Service (FaaS) platform which provides a suite of ready-to-use features to instantly add to your App(Mobile / Web / IoT).

A wide range of features offered by BackBuckle.io cloud can be integrated (using APIs) with your core business logic services eliminating the explicit need to design, develop & maintain other services that are not related to business logic. Thereby making Go-To-Market time to the least and dollar savings to the max.

For more info please visit https://www.backbuckle.io

Why BackBuckle

- Largest Portfolio of Features.
- Easy to Integrate. Any feature is just few API calls away.
- Super Fast APIs.
- Highly Secured, Highly Available, Flat Scalable services.
- 1/10th the cost of what it takes to build, maintain & deploy these in-house.
- Fundamentally supports Multi-dimensional & Multi-Role applications.
- In-depth Analytics & Data Insights on top of each features.
- Al-ML powered features.

Our Achievements

- Backed by Google under Google Cloud Startup Program.
- WON All India Startup Competition Elevate-X 2018 at IIT Madras, surpassing 250+ startups.
- EIR at Kalaari Capital.
